

**IN THE CLAIMS:**

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims 40, 52, 54, and 56, and CANCEL claims 55, and 57-59 without prejudice and disclaimer in accordance with the following:

**Claim 1-39 (Cancelled):**

**Claim 40 (Currently Amended):** An information storage medium, comprising:  
at least one title which is reproduced as a motion picture and has title identification information used for a title search; and  
title information, which corresponds to the at least one title,  
wherein the title information comprises title access type information indicating whether title reproducing by the title search to the corresponding title is permitted.

**Claim 41-51 (Cancelled):**

**Claim 52 (Currently Amended):** A reproducing apparatus supporting title reproducing by a title search using an information storage medium, comprising:  
a reader which reads titles, each of the titles having title identification information used for the title search, and title information corresponding to the respective titles from the information storage medium; and  
a title reproducing manager a decoder which selectively decodes ~~determines whether to reproduce~~ the titles designated by the title search based on the title information,  
wherein the title information comprises title access type information indicating whether title reproducing by the ~~title search~~ to the corresponding title is permitted.

**Claim 53 (Cancelled):**

**Claim 54 (Currently Amended):** The apparatus of claim 52, wherein the title reproducing manager~~decoder~~ interprets startup information from the title information and decodes one of the titles corresponding to the startup information first.

**Claim 55 (Cancelled):**

**Claim 56 (Currently Amended):** The apparatus of claim ~~55~~54, wherein the title reproducing manager~~decoder~~ comprises:

- a browsing engine decoding the browsing data and executing browsing commands from the decoded browsing data;

- a program engine decoding the program data and executing program commands from the decoded program data;

- a navigation engine decoding navigation commands in the titles and the title information;

- a presentation engine decoding the AV data; and

- an application manager controlling reproduction of the titles based on whether a portion of each title is startup information, core mode data, or full mode data and user input when the attribute information designates that the respective title is controllable by the user.

**Claims 57-59 (Cancelled):**

**Claim 60 (Previously Presented):** The information storage medium of claim 40, wherein the title search to the title is permitted when a value of the title access type information is 0, and the title search to the title is prohibited when the value of the title access type information is 1.

**Claim 61 (Previously Presented):** The reproducing apparatus of claim 52, wherein the title search to the title is permitted when a value of the title access type information is 0, and the title search to the title is prohibited when the value of the title access type information is 1.
